SOHO Pro™

Fiber Transition Cover Gen 2

The SOHO Pro Fiber Transition Cover 2 (FTC2) is a compact, low-profile transition point for storing up to 3’ of fiber drop cable and a simplex adapter. It’s ideal for test points, fiber-to-the-desk, and repair splices within a residence.

This aesthetically-pleasing enclosure conveniently fits over the footprint of standard wall outlets or within a Primex SOHO Pro Media Panel. A splice clip, which holds fiber splice and fiber adapter, mounts on each side of the FTC2 for convenient and accessible fiber routing. The FTC2 slim profile, and versatile mounting options are ideal for tight-space applications, providing true versatility to FTTH instillations.

FEATURES & BENEFITS

- Indoor fiber termination case that safely and efficiently stores up to 3’ of fiber slack.
- Versatile mounting in either Primex SOHO Pro™ Media Panels or on-wall over a standard gang box or mud ring.
- Low-profile design fits seamlessly into residential settings with minimal visual impact.
- Four simplex fiber adapter, and two splice mounting locations for versatile installation.
- Splice clip is compatible with fusion, ribbon, or mechanical splices.
- Break-off tabs provide flexibility for most fttx installations.
- Shuttered adapter version safely allows customer fiber access without opening enclosure.
- Tamper-resistant cover to restrict access.
- Mounting hardware included for media panel or gang box.
